

Cuddle Stone - Manual

1. Place the cuddle stone upside down on a soft surface to avoid potential scratches. Fill up the stone with ashes, a funnel can be used to make this process easier.

2. Close the opening of the cuddle stone by injecting a non-acid silicone sealant evenly in the opening by using a sealant gun.

3. After injecting the silicone sealant, evenly spread out any remains with a non-acid soap solution, for example with an adhesive spreader or a finger.

4. The hardening process of the silicone sealant will be completed within 24 hours, depending on the humidity and temperature of its surroundings.
